Re: CMEIG Priorities & Member Engagement

At the recent Annual General Meeting, CMEIG members voted to open up the association and encourage broader industry engagement.

Membership categories are now:

1. Manufacturers / Direct Importers
2. Dealers / Distributors of OEM Equipment Manufacturer / Importer.
3. Manufacturers or importers of parts or attachments for equipment
4. Affiliate members being providers of other products and service providers that have general application in the construction and mining industry. These members have no voting rights or Board eligibility
5. Life Members as acknowledged by their industry peers.

The objectives of the new structure are to:

- Enable increased engagement from Dealers on issues affecting them.
- Improve transparency of work undertaken in areas such as industry statistics and the engineering working group.
- Better communication of the industry and of CMEIG activities.

We seek your involvement through membership and by encouraging your contacts in the industry to also join CMEIG.

In May we will be holding an industry meeting seeking Board nominations from the new members categories. Details will be provided shortly.

Best Regards

David Birrell
